Academic Honesty Policy. Academic honesty is strictly enforced on quizzes, exams, and other aspects of this course. Academic dishonesty will result in a failing grade in the class and a letter in the student's file. Activities constituting academic dishonesty include:

Cheating
- Copying from others during an examination.
- Communicating exam answers with other students during an examination.
- Offering another person's work as one's own.
- Taking an examination for another student or having someone take an examination for oneself.
- Tampering with an examination after it has been corrected, then returning it for more credit.
- Using unauthorized materials, prepared answers, written notes, or concealed information during an examination.

Dishonest Conduct
- Stealing or attempting to steal an examination or answer key from the instructor.
- Allowing another student to copy off of one's own work during a test.

Collusion
- Any student who knowingly or intentionally helps another student perform any of the above acts is subject to discipline for academic dishonesty.

I understand and will abide by this academic honesty policy: ____________________________ (signature) Seat: ______

1. (Smith 7.56a and 7.62c, 4 pts)
   a. Rank the following in order of increasing S_N2 reactivity: ___ < ___ < ___

   ![Br Br Br](a) ![Br Br](b) ![Br](c)

   b. Rank the following in order of increasing S_N1 reactivity: ___ < ___ < ___

   ![Br](a) ![Br](b) ![Br](c)

2. Draw the product this S_N2 reaction and indicate the stereochemistry. (Smith 7.58c, 2 pts)

   ![Cl H](Cl) ![OCH2CH3](H2O-acetone) →

3. Write a curved-arrow mechanism for the solvolysis of 2-chloro-2-(p-methylphenyl)propane in aqueous acetone to form 2-(p-methylphenyl)-2-propanol. (Hint: The reaction involves water.) (3 pts)

   ![Cl](H2O-acetone) ![OH HCl](H2O-acetone) →

4. Propose a short synthesis of the following compound, beginning only with compounds containing five carbon atoms or fewer and any organic or inorganic reagents that you require. (1 pt)

   ![CN](CN)
