OBJECTIVE: To link students’ new ways of discussing sexual issues more openly (e.g., with fewer barriers) with their new attitudes about their own sexual behavior.

GOALS:
1. To evaluate the facilitators and the discussion sections
2. To promote the AIDS Fundamentals Facilitator Program
3. To learn proper use of condoms
4. To review and incorporate information presented during the quarter
5. To provide a sense of closure to the group and group members
6. To have fun!

MATERIALS NEEDED:
* Enough condoms for everyone in your group to have one
* 2 or 3 zucchinis or cucumbers (depending on the size of your group)
* Facilitator evaluation forms
* IEG evaluation forms
* 2 9 x 12 Envelopes for the sealed evaluations
* Facilitator Applications
* Jeopardy questions
* Prizes for everyone (optional)

ACTIVITIES:
1. Evaluations: Facilitator and IEG & envelopes
2. Promote the Facilitator Program & Distribute applications to interested students
3. Condom Use Activity
4. Condom Relay Activity
5. AIDS Jeopardy Game
6. Thank & Congratulate your students

PROCESS:
I. Before class, write your name (only the name of the LEAD facilitator) at the top of all facilitator evaluation forms, and also write the day and time at the top of each form.

II. Before students arrive, place evaluation forms (both facilitator and IEG) and an envelope on a table in the front of the room. Post yourselves at the door(s) to the room, and as students enter, ask them to pick up one of each of the evaluation forms and complete it in the first few minutes of class. Ask one of the students to collect the completed evaluations, seal them in the envelope, and let you know when everyone is finished. Facilitators should remain outside while evaluations are completed. This process should take no more than the first 10 minutes of class -- this is an action-packed agenda! As soon as your IEG is finished, deliver the sealed envelope containing the evaluations to the mailbox marked “Golwala” in Social Ecology I Room 209.

III. Take attendance

IV. Take about 5 minutes to tell your students about the facilitator program. Share your experiences and the benefits of being a facilitator. Encourage those who are interested to apply to be a facilitator next year. Pass applications out to those interested and ask them to return their applications before January 1.

V. "Steps to Proper Condom Use" Activity:
Divide your IEG into 2 smaller groups. Give each group a set of cards with each of the 15 steps, in random order and face down. Explain that the object of the game is to place the cards into the proper order. When they
think they are finished, they should yell out "Done!" and a facilitator will check to see if they have the cards in the correct order. If not, they should try again. When one team gets the order correct, they win, and should tell the other group the proper order. This should take about 5 minutes.

The following is the correct order:

1. Buy condoms and lubricant
2. Store condoms in a cool, dry place
3. Open package
4. Put lubricant in tip of condom
5. Slip condom over head of erect penis
6. Leave 1/2" at tip for semen
7. Squeeze air bubbles from tip
8. Roll condom down to base of penis
9. Engage in intercourse
10. Orgasm!
11. Hold base of penis/condom
12. Withdraw penis before losing erection
13. Remove condom from penis
14. Throw used condom in trash
15-16. Relax (there are two of these, and they can be placed anywhere in the sequence)

VI. While they are doing the first activity, one facilitator should write the following information on the board. After the activity, take a few minutes to review these steps, and remind the students that condoms are available for free at the Health Ed Center.

Condoms should always be:
(1) Fresh (some are dated)
(2) Made of latex
(3) Include a lubricant
(4) include a spermicide, especially nonoxynol-9
(5) placed properly:
* on an erect penis prior to penetration
* right side up
* space left in the tip
* rolled completely down
* lubricated more on the outside with water-based lubricants (not grease-based lubricants)

(6) removed and discarded properly:
* after penis is withdrawn, but before man loses erection completely
* held in place to contain semen
* discarded in trash

VII. Condom Relay Activity

Divide class into equal teams of about 5-6 people (fewer, if your group is small). If team sizes aren't equal, one or both facilitators should play. Large groups will have 3 teams; groups of 12 or fewer will have only 2 teams. Have each team line up in a straight line such that you can see everyone.

Give each group a zucchini or cucumber and each person a condom. Tell them not to open their condom until it is their turn. Explain the rules of the game. It is a relay race -- the first person places their condom on the zucchini (it must be done correctly), then remove its and passes the zucchini along to the next person. The first team to finish wins. (about 5 minutes)
VIII. AIDS Jeopardy Game

Draw Jeopardy chart on board (5 across, 5 down). Put categories (see below) at the top of each column, with point values underneath.

Divide class into two teams.

Play game, either by having whole team answer a single question (by discussing it together and coming up with an agreed-upon answer), or one person at a time, making sure that everyone has a chance to answer a question (by having each team go in a certain order, and repeating the order until the game is over). Variations and adaptations are OK. Be sure to keep score in a way that makes sense to you, and mark off boxes that have already been answered. Feel free to add your own questions, or create a new subject heading.

If you can, bring inexpensive prizes for everyone (like Anteater pencils, candy, etc.). One suggestion is to bring 2 kinds of prizes, and let the winning team pick which ones they want first, but obviously you want to give everyone prizes for their participation in the game.

JEOPARDY QUESTIONS

Category 1: CELEBRITIES WITH HIV/AIDS

For 1 point: On November 8, 1991, this Los Angeles Laker basketball player announced that he had tested positive for HIV.

Who is (Earvin) "Magic" Johnson?

For 2 points: This young boy is the most famous hemophiliac to die of AIDS. Was expelled from high school because of his infection which he got from contaminated blood during treatment. The federal CARE Act was set up in his honor.

Who is Ryan White?

or

This HIV positive actor played the role of Mike Brady on The Brady Bunch. He died in 1992.

Who is Robert Reed?

For 3 points: Housemates of this member of MTV's The Real World San Francisco had to learn how to live with someone with AIDS. He died soon after filming of The Real World finished.

Who is Pedro Zamora?

or

Las Vegas singer and piano player known for candelabras, lavish costumes, exotic cars and kitchy homes. In 1987, he died due to complications from AIDS.

Who is Liberace?

For 4 points: This actor from Hollywood's Golden Age hid his homosexuality for most of his life. His death was one of the first to bring widespread attention to the AIDS epidemic.

Who is Rock Hudson?

Or

This rapper, a member of the famous rap group N.W.A., died from AIDS related complications.

Who is Easy E?
For 5 points:  This tennis great was forced to go public with his diagnosis of AIDS because a tabloid newspaper was going to print the story.
Who is Arthur Ashe?

or

Olympic gold medalist in diving. Was the most outstanding amateur athlete in 1984 and went on to win back-to-back Olympic golds in both the 3m and 10m diving events. Following the announcement of his HIV status in 1995, he was dropped by majority of his corporate sponsors.
Who is Greg Louganis?

Category 2: AIDS IN THE MEDIA

For 1 point:  This actor won an Oscar for his portrayal of a young lawyer discriminated against because he had AIDS in Philadelphia.
Who is Tom Hanks?

For 2 points:  This 2005 movie is the film version of the Pulitzer and Tony Award winning musical about Bohemians in the East Village of New York City struggling with life, love and AIDS.
What is Rent?

For 3 points:  The 2003 HBO mini series that focused on HIV/AIDS. Was based off of Tony Kushner’s play by the same name. Starred Al Pacino and Meryl Streep.
What is Angels in America?

For 4 points:  The British singer of the band Queen who died of AIDS related complications
Who is Freddie Mercury?

For 5 points:  This Hollywood actress, known as much for her marriages as her movies, was one of the first public figures to devote time to raising money for AIDS research.
Who is Elizabeth Taylor?

Category 3: SAFETY EQUIPMENT

For 1 point:  Condoms made of this substance provide a barrier during sex that protects against transmission of HIV and other STDs.
What is latex?

For 2 points:  This substance is used to clean needles and stop possible transmission of HIV.
What is bleach?

For 3 points:  One of two safer sex practices that is considered 100% effective in preventing the possible transmission of HIV.
What is abstinence or masturbation?

For 4 points:  This square piece of latex should be used as barrier protection when having oral sex with a woman.
What is a dental dam?

For 5 points:  This spermicide was found to kill HIV in laboratory tests but may actually increase the likelihood of transmission so is no longer recommended.
What is Nonoxynol-9?
Category 4: HARD FACTS

For 1 point: This group currently has the fastest growing HIV infection rate. Who are heterosexual minority women?

For 2 points: HIV is very fragile and dies quickly when it comes into contact with air, acidic environments, or soap and water. The AIDS virus most easily survives in these TWO of the four bodily fluids. What are blood, semen, vaginal secretions, and breast milk?

For 3 points: This blood test, the most common one performed when testing for HIV, detects antibodies of HIV, not the presence of the virus itself. What is the ELISA test?

For 4 points: In this year, nationwide screening for HIV in the available blood supply began. What is 1985?

For 5 points: This class of drugs, when used in conjunction with AZT and another medications, was recently found to dramatically reduce the amount of HIV (or viral load) in a person receiving this treatment. What are protease inhibitors?

Category 5: INTERNATIONAL

For 1 point: This region of the world accounts for the vast majority of HIV infections and AIDS deaths: What is sub-Saharan Africa?

For 2 points: This country guarantees access to HIV drugs to all citizens who need them: What is Brazil?

For 3 points: This public program pays for most HIV drugs in the US: What is Medicaid?

For 4 points: The CDC recently passed guidelines recommending that this age group should be tested for HIV as part of their annual medical check-up: What are 13-64 year olds?

For 5 points: World AIDS Day is observed every year during this month. What is December? (Dec. 1st since 1988)

VIX. Use the remaining time to say whatever you want to say to the group about having worked with them, and give them a chance to say anything they want to about their experiences in the IEG. Thank them for being a great group, and let them know they can get in touch with you (if you want to) if they ever need to (if you do not want to do this, give them an alternate referral like he Health Ed Center, Counseling Center, etc., in case they want to talk to someone). Say goodbye, wish them well, and send them on their way...
