

Dear Instructor,

Please consider using the EEE ClassMail List for this course.

Every class has a mail list created automatically, which you can use to:

- Notify us of changes or send announcements
- Send class readings and files
- Send answers to common questions to the whole class at once

EEE ClassMail Lists are already set up each quarter and are easy to use. Simply send a message to the list and it will be forwarded to all enrolled students.

List addresses follow a standard format: **coursecode-quarteryear@classes.uci.edu**

For example, the address for HISTORY 21A DIS 1 (99104) in Spring 2010 would be:

99104-S10@classes.uci.edu

Plus, the messages are easy to find in the online archive and you can customize your list to add members, create combined lists to reach multiple classes, change from 'announcement' to 'discussion' so students can send as well as receive, and more.
